

OWNER ONBOARDING PACKET

Welcome to your AI Marketing System.

Everything Paul needs to operate the Tekky portal from day one — credentials, tab tour, what's automated, what's on you, pricing breakdown, account-creation permissions, and our card-on-file policy.

Prepared for: **Paul Hanson**
Delivered: **2026-05-18**

01 · YOUR PORTAL

Bookmark this URL.

Portal URL: <https://bluejayportfolio.com/clients/zenith-sports/portal>

Your login credential

Paul Hanson

Email: paul@zenithsports.org

Temp password: tekky-walkthrough-paul-2026

■ **Change your password as soon as you log in.** Click the avatar in the upper-right of the portal → "Change password." The temp password above stops working once you set a permanent one.

Set your new password (click to type, or print + handwrite)

Paul — new password: _____

Never share the new password over Slack or email. Pass it verbally or via a password manager.

02 · TAB TOUR

Where you'll spend your time.

The portal is the cockpit. ~80% of your time lives on the Leads tab. The rest is occasional check-ins.

■ Leads	Every parent / coach / player / club inquiry that lands in your funnel. Color-coded by audience: ■ Amber=Parent · ■ Cobalt=Coach · ■ Lime=Player · ■ Violet=Club.
■ To-Do	Task list. Each task has an owner (you or Ben) so it's clear who's holding the ball.
■ Ads	Read-only view of your ad creative library. 43 creatives across Meta, Google, and Lob postcards. Stats hydrate once campaigns go live.
■ Reports	Weekly auto-generated report. Fires every Monday 14:00 UTC. Pipeline value, leads by audience, top-performing ads, week-over-week deltas.
■ Partners	Affiliate partner roster + referral activity + commissions accrued.
■ AI Operator	Five AI skills that come online over the next 30 days: Reply Drafter (wk 1) · Audience Detector (wk 1) · Drill of Week (LIVE) · Customer Save Agent (wk 3) · Lead Scorer (wk 4).

03 · WHAT'S INCLUDED

Built and ready for you.

Beyond the portal you just toured, the AI System ships with the website (preview live · final tekky.org launch + Shopify integration this week, on Ben), funnel engine, and the tracking layer that makes the whole thing get smarter over time. Quick reference list — scan it once so nothing gets forgotten.

Your website (preview live, final launch this week)

- Bespoke showcase built ground-up to TEKKY's brand — not a template. Preview live at bluejayportfolio.com/clients/zenith-sports.
- **Pending this week (on Ben):** tekky.org domain flip + Shopify shop integration so the Shop page routes cleanly to your Zenith Sports checkout. No action needed from you — Ben handles both.
- Interactive Build-Your-Player tool — parents pick age + position, get a personalized training plan. Already live in the preview.

Your portal cockpit

- 986 leads pre-loaded, color-coded by audience (■ parent · ■ coach · ■ player · ■ club).
- Cmd-K search + bulk-action toolbar — log a touch on 50 leads in 3 clicks.
- Per-audience funnel visualization with feedback that texts Ben directly.
- Weekly auto-report every Monday + Sales/Partners portal for your affiliate roster.

Your funnel engine

- 6-touch parent + coach + player email sequences, fully automated by day-offset.
- 43 ad creatives ready across Meta Feed/Reels/Stories + Google Search/PMAX/YouTube + Lob direct mail.
- AI Lead Reply Drafter + Audience Detector — drafts personalized replies in your voice (Phase A).
- Drill of Week auto-broadcasts to coach list every Tuesday 9am PT (already LIVE).

Tracking + analytics (the invisible improvements)

- **Microsoft Clarity heatmaps** installed — see every click, scroll depth, and rage-click on every page.
- Meta Pixel + Google Analytics 4 firing on every conversion event.
- Per-audience conversion-rate tracking — you'll know which audience converts at what rate by week 2.
- Custom event tracking on every CTA (shop, training drills, contact form, build-your-player).

SEO that compounds (the long-tail engine)

- **llms.txt + JSON-LD structured data** ship with every page — ChatGPT, Claude, Perplexity, Gemini, and Bing AI parse TEKKY cleanly when someone asks for soccer training in your area.
- **Lead-gen data feeds back into the site** — anonymized lead counts, audience-mix snapshots, and recent-activity badges store on-site as fresh, indexable signal that search engines re-crawl.
- **Sitemap + internal linking auto-regenerate** as new audience pages, drills, and case studies land — every funnel addition becomes another SEO surface.
- Result: search rank compounds month over month. Most agencies treat SEO as a separate \$1.5k/mo line item; here it's the byproduct of the funnel running.

If anything on this list ever feels invisible to you, that's a feedback loop I want to hear about. Text or email — see the Communication section.

04 · OWNERSHIP

What's automated. What's on you.

■ ON AUTOPILOT

- Weekly drill broadcast to coach list (Tuesday 9am PT)
- Funnel touches via email (parent 5-touch / coach 6-touch / player 3-touch sequences) — fire automatically by day offset
- Weekly report email to Paul + Philip (Monday 14:00 UTC)
- Lead inquiries via portal contact form
- Map-based scout dispatch (Tekky Map → click county → cron picks it up Tuesday 14:00 UTC)

■ STILL ON YOU (until Phase B handoff)

- Reviewing AI-drafted replies before sending (week 1+)
- Calendly bookings (we'll wire your calendar after Phase A)
- Recording the 3 voicemail clips (18-24 sec each, casual founder voice)

■ STILL ON BEN

- Ad creative iteration based on weekly performance data
- Hyperloop variant optimization once data warrants the upgrade
- Funnel copy tweaks (use "+ Note" button on any funnel step — Ben sees them within an hour)

05 · PRICING REFERENCE

What you're paying for.

Service	Tier	Price	Status
AI System buildout	\$10,000	one-time	4 quarterly installments of \$2,500. Q1 due at launch. Each installment includes ~\$37 reserved for WA state Business & Occupation tax (1.5% of service revenue, \$150 total across the program), remitted by BlueJays directly to the state — no extra charge to you. \$300 pay-in-full discount available for clients who pay the full \$10,000 up front — not applied on the 4-installment plan.
Hyperloop (auto-optimization)	Off → Starter	\$0 → \$99 / mo	Flip after 50+ leads
Claude (AI replies + drafting)	Pro	\$149 / mo	Live from Phase A
Twilio (SMS + missed-call)	TBD	~\$10-30 / mo	Starts when number provisions
SendGrid (email)	Starter	\$0	Included in setup
Meta · Google Ads	TBD	ad spend only	Starts Phase A stand-up

Quarterly installment schedule

Each installment: **\$2,463** services + **\$37** WA B&O tax reserve = **\$2,500** total. Total program: **\$10,000** (\$9,850 services + \$150 WA B&O tax reserve at 1.5%, remitted by BlueJays directly to the state). Pay-in-full discount of **\$300** available for clients who pay the full program up front — not applied on the 4-installment plan.

- Q1 — \$2,500 at launch (Monday 2026-05-18)
- Q2 — \$2,500 on 2026-08-17
- Q3 — \$2,500 on 2026-11-17
- Q4 — \$2,500 on 2027-02-17

When the build clock starts

Phase A account stand-up and build work begin the business day Q1 payment clears. This is standard for engagements at this scope — it keeps the launch timeline honest on both sides and ensures your accounts aren't

sitting half-provisioned while an invoice is open. Once the first installment lands, the 30-day onboarding window starts the same day.

Phase B handoff

Target: 30 days post-launch. Account ownership transfers from BlueJays-managed → Zenith-managed for Twilio, Google Ads, Meta Business Manager. You start paying those vendors directly. BlueJays still operates them.

06 · ACCOUNT ACCESS

Logins I need from you for Phase A.

Phase A plugs into several accounts you already own (Shopify, Facebook/Meta, Google, your domain registrar) plus a few new ones I'll stand up on your behalf (Twilio, SendGrid, Calendly, etc.). Fill in the credentials you can share below — every password lands in your encrypted credentials vault the moment I receive it (AES-256). If you'd rather hand them off verbally or via a password manager, leave blank and we'll coordinate.

Authorization

- ☐ I authorize BlueJays (Ben Freeman) to create accounts on TEKKY's behalf for the Phase A buildout — Twilio, SendGrid, C
- ☐ All accounts created remain owned by TEKKY. Ownership transfers to TEKKY-managed billing during Phase B handoff (ta

ACCOUNT LOGINS

Share what you have. Skip what you don't.

■ Email account

The inbox you'd like me to use for new accounts (or an existing shared inbox if you have one).

Username / email:

Password:

■ Shopify (Zenith Sports store)

Admin-level access so I can wire the Shop CTAs + verify inventory events fire to Meta Pixel + GA4.

Username / email:

Password:

■ Facebook / Meta Business Manager

Personal FB login is fine — I'll request admin access on your Business Manager from there. Used for Meta Ads + Pixel + Instagram.

Username / email:

Password:

■ Google account (Ads + Analytics)

Used for Google Ads, Google Analytics 4, and Search Console. If you have a Google Workspace under TEKKY, share that one.

Username / email:

Password:

■ Domain registrar (tekky.org)

Where tekky.org is registered — pick your provider so I know where to find your DNS settings. If your registrar isn't in the list, check Other and write it in.

- | | |
|---|---|
| ☐ GoDaddy | ☐ Namecheap |
| ☐ Cloudflare Registrar | ☐ Squarespace / Google Domains |
| ☐ Hover | ☐ Network Solutions |
| ☐ Bluehost | ☐ Domain.com |
| ☐ Name.com | ☐ HostGator |
| ☐ Other — write it in below: | |

Other registrar name:

Username / email:

Password:

Prefer to handle DNS yourself? Skip the credentials and I'll send you the two nameservers to paste — should take 60 seconds in your registrar's dashboard.

07 · CARD ON FILE

Our spending rules. Locked in writing.

Several Phase A accounts (Twilio, Meta Ads, Google Ads, SendGrid paid tiers, etc.) require a payment method on file to function. Rather than asking you for your card every time we hit a subscription gate, you can leave one card on file with me and I'll use it strictly under these rules:

BlueJays card-on-file commitments

- I will **always ask you before** charging any card or entering card details into a new piece of software.
- Cards are entered **directly into the vendor's secure form** (Twilio, Meta, Google, etc.) — never stored in a BlueJays system, spreadsheet, or chat thread.
- I will give you a **cost estimate first** for any account that charges more than \$0/month, and confirm before activation.
- You can **revoke this permission at any time** in writing — we'll switch to per-charge approval immediately.
- Monthly spend on managed-account vendors gets reported in your weekly Reports tab, with a line item per vendor.

Acknowledgment

☐ I've read and understand the card-on-file policy above. Ben will always ask me before charging a card or entering one into

08 · ACTION ITEMS

What's on you. Check off as you go.

Within 24 hours of launch

- ☐ Log in and change your password
- ☐ Bookmark the portal URL on phone + laptop
- ☐ Add bluejaycontactme@gmail.com to your safe-senders list

Within 1 week

- ☐ Record voicemail clip #1 — Welcome (18-24 sec)
- ☐ Record voicemail clip #2 — Missed call (18-24 sec)
- ☐ Record voicemail clip #3 — After hours (18-24 sec)
- ☐ Confirm your preferred contact email for AI Reply Drafter
- ☐ Connect your Google Calendar (we'll send the link)

Answer the quick-start questions online at bluejayportfolio.com/sign/zenith-sports/handoff — Ben gets your replies via text + email the moment you submit. (Don't fill answers here in the PDF — the online form is the single source we operate from.)

09 · VOICEMAIL SCRIPTS

Three clips. Your voice. Brand-aligned.

When you sit down to record the three voicemail clips, read these scripts as-written. They're 18-22 seconds each, calibrated to Tekky's brand voice (specific, coach-like, no hype). Use Voice Memos (iOS) or Recorder (Android), then email the three .m4a files to bluejaycontactme@gmail.com — Ben uploads them to your Twilio account.

Recording tips

- Quiet room. Phone speaker face-down on a folded towel.
- Stand up. Voice comes through firmer than sitting.
- Smile on Clip 1 and 2 — it actually changes the tone.
- If you flub a line, restart the whole take. Editing splices are audible.

Clip 1 — Welcome / Main greeting

Target length: 18-22 sec

“Hey, this is Paul over at Zenith Sports and Tekky. Thanks for calling. Quickest way to reach me is to leave your name, what your player's working on, and your number. I'll get back to you the same day. If you want training tips or to grab a Tekky ball, head to tekky.org. Talk soon.”

Clip 2 — Missed call callback

Target length: 18-22 sec

“Hey, Paul from Tekky here. Sorry I missed your call — I'm probably with a player on the field. Drop me your name, what your player needs help with, and the best number to reach you back, and I'll call you the same day. If you want to grab the ball or see drills, that's at tekky.org. Talk soon.”

Clip 3 — After hours

Target length: 18-22 sec

“You've reached Paul at Tekky. We're closed for the evening — I check messages first thing in the morning. Leave your name, your player's age, and what you're working on, and I'll get back to you tomorrow. For drills or the Tekky ball, head to tekky.org anytime. Have a good one.”

You can also read these scripts in your portal — Docs tab, always available on your phone when you sit down to record.

10 · HOW WE COMMUNICATE

Two channels. Both fast.

Funnel changes (copy, layout, audience)

Click "View funnel" on any audience card in the portal → "+ Note" button → type your note → Send. Ben gets it via SMS + email and ships within one business day.

Everything else

Text or email Ben directly. Phone number was in your kickoff email. Team email:
bluejaycontactme@gmail.com.

Brand voice reference

Every email, SMS, ad, and AI-drafted reply that goes out in TEKKY's name follows the locked voice rules in your separate **Brand Voice** reference packet. Read the "Voice rules" and "Forbidden words" sections once. If you notice copy drifting from this voice, flag it via the feedback path above.

Sign-off

By signing below, Paul acknowledges receipt of the portal, login credential, Phase A scope, account-creation authorization, and card-on-file policy as described in this packet. Sign-off doesn't lock you into anything — it's the milestone marker for the start of Phase A.
