

Service-Level Agreement

BlueJays Business Solutions LLC · effective May 18, 2026

This SLA is the working contract between BlueJays and every AI System (\$10,000 one-time) client. It defines how fast we respond, when we're available, and what's in or out of scope. Read once, acknowledge, and keep it handy — these are the numbers we hold ourselves to.

Response commitments

Every request is triaged into one of four lanes. The slowest lane still beats most agencies' fastest.

Channel / scenario	Our commitment
Standard email Questions, requests, ideas, small copy/funnel tweaks	4 business hours Mon–Fri 8a–6p PT · if you write Saturday morning you'll usually hear back same day
SMS lifeline (priority) 2 lifelines included per calendar month · for the moments that can't wait for email	1 hour during business hours 4 hours after-hours or weekend · additional lifelines \$50 each
Ad-account fire-drill Meta/Google account suspension, billing failure, broken pixel, ad creative pulled	24 hours Triageed immediately on detection, fix or workaround within 24 hours of you flagging it
Funnel / copy revision Standard cadence work — rewrite a step, add an audience, swap an offer	2 business days Faster on weeks where no fires are burning; this is the worst-case guarantee

Availability

Business hours: Monday–Friday, 8:00am–6:00pm Pacific Time. After-hours and weekend windows are covered for SMS-lifeline and fire-drill lanes only; standard email queues until the next business morning.

Holidays observed (no standard-lane response): US federal holidays plus December 24–26 and December 31–January 1. Fire-drill lane stays active year-round.

Maintenance window: first Sunday of each month, 2:00am–4:00am PT. Portal may be intermittently unavailable. Critical pushes outside this window are announced 24 hours ahead via email + portal banner.

Uptime target: 99.5% for the owner portal and lead-capture endpoints. Live status: bluejayportfolio.com/status.

What's included every month

Beyond the response commitments above, every AI System client also gets:

- **Weekly 20-minute strategy call** during the 30-day install rollout. After install we communicate as needed — no forced cadence.
- **2 SMS lifelines** per month (define above).

- **Weekly progress email** every Friday (8a PT) showing what shipped, what's in flight, and the leads/funnel numbers for the week.
- **Monthly funnel review:** one of your active audience funnels gets a full audit + revision proposal sent your way.
- **Unlimited small copy edits:** hero tagline, button text, FAQ updates, headline tweaks — routed through the standard-email lane.
- **Bug + outage response:** any portal bug or feature regression we ship gets fixed without counting against your lifeline allotment.

Out of scope (or billed separately)

We won't ghost on these — we'll just give you a clean quote first.

- **New product builds** not in your original AI System scope (custom integrations, new tenant-facing features, large new sections). Quoted as add-ons.
- **Third-party platform outages** (Meta, Google, Twilio, Stripe, Supabase, Vercel). We escalate on your behalf and report ETA; we can't promise fix times for systems we don't control.
- **Ad spend + AI infrastructure (Claude, etc.)** — you pay the vendors directly. We set up + manage the accounts during install; ongoing usage charges aren't part of the \$10,000 program fee.
- **Optional managed-operations retainer (\$500/mo)** — if you want BlueJays to keep actively overseeing your funnel, ads, and AI Operator after the 30-day install window (rather than the as-needed updates model). Not promoted publicly — available on request only.
- **Data exports / migrations** to your own systems beyond the standard API (read-only at [bluejayportfolio.com/api/v1/clients/\[slug\]/leads](https://bluejayportfolio.com/api/v1/clients/[slug]/leads)) are billed at our hourly rate.

What continues after the 4-installment program

The \$10,000 covers a one-time AI Marketing System buildout paid in 4 quarterly installments. Once the 4th installment lands, here's what stays on and what changes:

- **The system is yours.** Site, portal, funnel definitions, ad library, brand-voice configuration, and lead data all stay live under your account and your domain.
- **AI replies continue.** Lead Reply Drafter, Audience Detector, and Drill of Week broadcasts keep running because you pay the underlying AI vendor (Claude / OpenAI) directly on your card. BlueJays doesn't gate that.
- **BlueJays steps back to as-needed.** No more scheduled cadence. I'm available for updates, fixes, and questions on the same SLA response times — you reach out when you need me.
- **Optional ongoing oversight (\$500/mo).** If you want me actively managing weekly ad iteration, funnel optimization, and weekly strategy calls beyond the 30-day install window, we add the \$500/mo managed-operations retainer. Available on request only — not promoted publicly.

Data ownership

Everything generated under your slug is yours, period.

- **Lead lists, customer data, ad performance metrics, brand voice configs, funnel content, voicemail recordings, weekly reports** — owned by you. BlueJays is the operator, not the owner.

- **Export anytime.** Standard CSV export from the portal Leads tab is one click. Full-database exports (everything across every table tied to your slug) are available on request — 1 business day turnaround, no fee while you're an active client, \$250 one-time fee for ex-clients.
- **If you cancel or non-renew the optional \$500/mo retainer,** your data stays exactly where it is. You keep portal access, lead data, and the site. BlueJays just stops actively managing iteration work.
- **Source code + custom assets** built specifically for TEKKY (your bespoke site code, your funnel JSON, your ad creative files) are yours on request. The underlying BlueJays platform (shared portal infrastructure, generic templates) stays our IP.

Escalation path

When something feels off, here's the right channel in priority order:

Channel / scenario	Our commitment
1. Standard email	bluejaycontactme@gmail.com — covers 95%+ of requests
2. Portal '+ Note' pill	Drop a note on any funnel card — routes to Ben's inbox + SMS
3. SMS lifeline	Text the number on your welcome card — uses one of your 2/month allotment
4. Direct phone	Reserved for true emergencies (active outage, locked out, billing crisis). Phone number on welcome card.

Acknowledgment

By signing below (or clicking submit on the digital sign page at [bluejayportfolio.com/sign/\[your-slug\]/sla](https://bluejayportfolio.com/sign/[your-slug]/sla)) you confirm you've read this SLA and understand the commitments, exclusions, and escalation order described above.

This SLA may be revised with 30 days written notice. The current version is always available at bluejayportfolio.com/onboarding/bluejays-sla.pdf.
