

WALKTHROUGH PREP SHEET

Tekky backend tour script + checklist.

Ben-facing prep doc for the 90-minute backend tour with Paul + Philip. Originally written for the 2026-05-13 walkthrough; still the master reference for any future Tekky meeting.

Founders: **Paul Hanson · Philip Lund**

Portal: <https://bluejayportfolio.com/clients/zenith-sports/login>

PRE-MEETING

Run these before you log in.

DB prep

Paul + Philip failed_attempts reset to 0

All 6 subscription rows seeded (claudio=Pro/\$149, hyperloop=none, twilio/sendgrid/meta-ads/google-ads seeded)

Login test (incognito)

Paul login works → tekky-walkthrough-paul-2026

Philip login works → tekky-walkthrough-philip-2026

If either fails, run emergency reset SQL (see runbook)

Pricing reconciliation

Confirm doc says: \$9,700 in 4 quarterly installments of \$2,425. Q1 due at launch.

Stripe sub action taken:

Q1 payment link URL:

SCRIPT · 90 MIN WINDOW

Stay on track. Talk less than them.

0–5 min — open with framing

“The website you saw is the storefront. What I want to show you today is what actually runs the sales engine behind it. The website is one of seven things this system does — and you’re paying for the system, not the page.”

5–25 min — Leads tab (heart)

Lead with audience filter ON. Show: ~1,000 leads in system, color-coded audience strip, Cmd-K search, click a lead → expand notes + history + 4 touch actions, bulk-select 5 → toolbar → bulk Log email or Start funnel. **Sell line:** “Every parent that hits any of your touchpoints shows up here within minutes. Not next week in a CSV. Now.”

25–40 min — To-Do tab

Show ~25 active tasks (10 yours, 13 theirs, 2 blocked). Filter by owner. Bulk-actions: mark done, send back to Ben. Walk through ONE of their pending items live. **Sell line:** “This isn’t a Slack channel. You can see who’s holding the ball at every moment, and so can I.”

40–55 min — Insights / Subscriptions

Claude Pro \$149/mo = AI gating (unlocks Reply Drafter + audience auto-detection). Hyperloop = Off (flip after 50+ leads/week). Twilio + Meta Ads + Google Ads = Paused (come online Phase A). **Sell line:** “Subscription model is the gear shift. We’re not upselling — we’re making sure you don’t pay for horsepower you don’t need yet.”

55–70 min — Ads tab + AI Operator preview

Ads tab: 43 creatives across Meta + Google + Lob. AI Operator: 5 mock skills (Lead Reply Drafter wk1 · Audience Detector wk1 · Drill of Week LIVE · Customer Save Agent wk3 · Lead Scorer wk4). **Sell line:** “Each of these replaces an hour-per-week of your time. Stacked = 5+ hours back to you. That’s the ROI calc.”

70–85 min — Their 5 walkthrough questions

See next page — bring these up if Paul + Philip don’t.

85–90 min — close + next step

“Two things to leave with: bookmark the portal URL, and change your passwords. I’ll send you the onboarding-handoff PDF so you’ve got everything in writing. Phase A kicks off the moment you reply to that email with the access we discussed.”

THE 5 QUESTIONS

Capture their answers here.

1. Which of you is the primary portal user (Paul vs. Philip)?

2. 4th audience added before Phase A (e.g., "trainer" / "academy"), or stick with parent/coach/player/club?

3. Comfortable with temp passwords, or want fresh ones via Signal?

4. Twilio: local Pacific NW number, or vanity (e.g. 1-855-TEKKY-01)?

5. Voicemail clips — when can Philip block 30 min to record the 3 templates?

POST-MEETING

Lock the work in.

Email Paul + Philip the onboarding-handoff PDF

Confirm both temp passwords have been changed

Pre-edit the pricing rows in handoff doc to match reconciled tier

Update memory/project_zenith_tekky.md with meeting outcomes

Schedule Phase A kickoff call

Meeting notes / vibes / open items
