What this is

After our 2026-05-14 walkthrough and your follow-up note on the Service Agreement, we've reshaped the engagement into a phased path. **Phase 1** (this document) is the standard \$997 + Washington state sales tax website + SEO foundation, set up directly on TEKKY's Shopify store. **Phase 2** — the full \$10,000 AI Marketing System — remains on the table whenever your inbound flow + club deal-flow tells you it's time, at the same scope we already discussed.

This packet covers exactly what Phase 1 delivers, what we need from you to start the build, the pricing breakdown, and the signature block at the back.

What Phase 1 delivers

Deliverable	What's included
Bespoke TEKKY website	The custom design we've already aligned on — not a template. Honored at the standard-tier price as a one-time exception given the work already completed.
Shopify store integration	Site set up directly on TEKKY's Shopify store so you have the polished website + native commerce stack you were initially seeking. Product pages, cart, and checkout stay native to Shopify.
SEO foundation	JSON-LD structured data, llms.txt (AI-crawler discovery for ChatGPT, Claude, Perplexity, Gemini, Bing AI), Open Graph + Twitter meta tags, XML sitemap, robots.txt. The long-tail SEO engine that most agencies bill as a separate ~\$1.5K/mo line item — included as the foundation.
Contact capture	Contact form on the site routing inquiries directly to your inbox. Optional Twilio SMS alert on every new lead can be wired up — let us know in the sign-off form.

Hosting + maintenance (year 1)	Hosting on Vercel, ongoing maintenance, and standard content updates included for the first year. After year 1, the \$100/yr standard renewal keeps the site live + maintained.
-----------------------------------	---

What Phase 1 does NOT include

These items are part of **Phase 2 — the \$10,000 AI Marketing System**. They stay off-scope for Phase 1 so the budget supports your grassroots ad spend instead. When you activate Phase 2, they all turn on at the originally-discussed scope:

- Per-audience funnel engine (parent / coach / player / club tracks)
- AI inbound responder (drafts replies in your voice)
- Hyperloop A/B (auto-optimizes ad headlines + email subjects)
- Custom ad creative library (Meta Feed/Reels/Stories + Google Search/PMax/YouTube)
- Affiliate / club partner program with commission tracking
- Weekly Monday digest of leads + spend + conversion
- Owner portal cockpit with Cmd-K search + bulk-action toolbar
- Lead magnet generation + multi-platform distribution

Pricing breakdown

Item	Amount
Phase 1 base — site + SEO + Shopify integration	\$997.00
Washington state sales tax (destination-based, ~10.1–10.5%)	calculated by Stripe at checkout based on your ZIP
Year-1 hosting + maintenance + updates	included
Year-2+ standard renewal (per year)	\$100.00

Payment: one-time charge at signing. Stripe Payment Link calculates and adds Washington state sales tax at checkout. Build work starts the business day funds clear. No installment plan on the standard tier.

Timeline

Milestone	What happens
Day 0 — payment	Stripe charge clears. Build work begins same business day.
Day 1-3	Shopify access wired up. Final brand assets locked. Site copy reviewed for tone.
Day 3-7	Site built + SEO foundation deployed. Internal QA pass on desktop + mobile.
Day 7-10	Staging link sent to you for review. One revision round (during build) included — iterate on copy, layout, photos, colors before we agree on the final version.
Day 10-14	Final revisions applied. Site goes live on tekky.org. Search Console + analytics confirmed. One post-launch revision round also included (see Terms below).

What we need from you

Shopify admin access

Best path is inviting ben@bluejayportfolio.com as a Staff account on your Shopify admin. Alternative: a screenshare during setup. Either works — confirm preference in the sign-off form.

Final brand assets

Highest-resolution logo you have, brand colors (hex codes), and any photography you want featured on the site. If something needs sourcing, we'll handle it from stock libraries with your sign-off.

Contact form destination

Email address where leads from the contact form should land. Optional SMS-on-new-lead can also be wired up via Twilio — just let us know your cell + whether you want it on.

Owner cell phone

Used for any urgent owner alerts (site issues, lead spikes, payment events). Never used for marketing.

Preferred launch window

How fast you want Phase 1 live — ASAP, within two weeks, or a target date. The 7-14 day timeline above is typical; we can compress for ASAP if Shopify access + brand assets land on Day 1.

The path to Phase 2 (whenever you're ready)

Phase 1 puts TEKKY on a polished, SEO-foundation-baked site that supports your grassroots ad spend. The AI Marketing System we originally scoped is built to generate inbound flow, not optimize existing flow — so it makes sense to activate it when your grassroots motion has produced enough volume + club relationships that the system has real data to work with.

When that moment arrives, the full \$10,000 AI Marketing System is still on the table at the originally-discussed scope:

- Per-audience funnel engine (parent / coach / player / club)
- Custom ad creative library spanning Meta + Google + Lob direct mail
- AI inbound responder drafting in your voice
- Hyperloop A/B auto-optimization on ads + emails
- Affiliate / club partner program with commission tracking
- Weekly Monday digest of leads, spend, and conversion
- Owner portal cockpit

No re-pricing or re-scoping needed when you activate. The same offer stands.

Working contract

Separate from this packet, there's a one-page Service-Level Agreement at bluejayportfolio.com/sign/zenith-sports/sla that covers response times for site issues, what's included in year-1 maintenance, what's out of scope, and the escalation order when something feels off. Please review + acknowledge it in the same sitting as this packet.

Terms

Four housekeeping items, spelled out so there's no ambiguity later:

Revisions

Phase 1 includes **one revision round during the build** (iterate on copy, layout, photos, colors on the staging link before we agree on the final version) **plus one post-launch revision round** after delivery (catch anything that surfaces once the site is live). Beyond that, additional revisions are billable — typically small edits are flat-rate, larger changes get a written quote before any work starts. Nothing gets invoiced without your sign-off first.

Pre-go-live refund

If you decide to walk away **before the site goes live on tekky.org**, you get a full refund of the \$997 (sales tax is non-refundable per WA state). Once the site is live and the final-revision round has been

delivered, the work is considered accepted and the payment is non-refundable.

Stock photography

We work from your photo library first. Stock photography is used only when there's a specific gap your library can't fill, and only with your sign-off on each image. Any stock licenses needed for Phase 1 are **included in the \$997** — no separate charge.

Washington state sales tax

WA state sales tax is destination-based — Stripe calculates the exact rate at checkout from your ZIP code. Tekky's Washington address puts the rate in the **10.1–10.5%** range, so budget roughly \$100–\$105 on top of the \$997.

Acknowledgment

By signing below (or completing the acknowledgment form at the sign URL on the cover), Paul + Philip confirm: (a) Phase 1 scope and pricing as described above; (b) that Phase 1 does not include the AI Marketing System features listed on page 1; (c) the Terms above (revisions, refund, stock, sales tax); and (d) that Phase 2 remains available at the originally-discussed scope whenever activated.
